

MEMORANDUM

To: Bill Knuckles, P.E., Sanitary Services
From: Randy Lyman
Date: November 16, 1998
Subject: 4580 W. Calhoun

I received a call from Curtis Eckhoff, 868-6719, of APAC - Masters Jackson Paving, regarding a new facility at 4580 W. Calhoun. Mr. Eckhoff called to see if the truck wash facility at this location needs a Industrial Discharge Permit from my section. He said they have a sand/oil-water separator and a sampling manhole and plan to have the interceptor pumped out regularly. I told him they do not meet our definition as a significant industrial user and do not need a wastewater contribution permit from my section. I did tell him that Linda Russell could find no permit for this address regarding payment of a connection charge (impact fee) and I don't believe plans were submitted to the City prior to connection to the City sewer. This facility is in Greene County and appears to be similar to the CTI Trucking Co. problem just south of this. I'll have the inspector for this area check it out. This facility apparently is now occupied. See attached utility information regarding this address.
